# MATJEKELANE PRE SCHOOL

- The royal council was consulted and they identified the project for Mirma Development.
  - It was a already built school that was in need of a revamp and they had a water provision problem.
  - Their borehole had fallen closed and they did not have water for the pre-school.
  - The toilet and play area also needed attention
  - Open the borehole and install casing to prevent an occurrence of the previous problem
  - Total over do of the toilet facilities
  - Water network
  - Upgrade the play area
  - Maintenance of the school building
- 
- Duration of project
  - 2 weeks
